Description: Debian is Linux distribution composed of free and open source software, developed by community supported Debian Project, which was established by Ian Murdock on August 16, 1993. Debian comes with over 59000 packages (precompiled software that is bundled up in nice format for easy installation on your machine), package manager (APT), and other utilities that make it possible to manage thousands of packages on thousands of computers as easily as installing single application.

Abbreviations: Debian

Synonyms: Debian - The universal operating system, Debian GNU/Linux

Resource Type: data or information resource, database, software repository, software resource, source code

Keywords: operating system, software package, FASEB list

Availability: Free, Freely available

Resource Name: Debian

Resource ID: SCR_006638

Alternate IDs: nlx_151598

License: GNU General Public License
