(RRID:SCR_007483)

Description: The Department of Pharmacology and Neuroscience at Texas Tech University is committed to providing a strong education experience for all trainees. The department's primary areas of training emphasis are neuroscience/ neuropharmacology and cardiovascular/ autonomic pharmacology. Our objective is to prepare students for careers in research and teaching. We currently have 14 faculty and who conduct research in a broad variety of subjects ranging from environmental toxicology to molecular pharmacology. This allows a broad basis for a strong theoretical as well as 'hands-on' education in pharmacology. The faculty of the program work hard to foster a creative and productive research atmosphere, to provide encouragement and positive challenges, and to equip students with the intellectual tools they will need to be good teachers and investigators.
