Proper Citation: ExPASy Biochemical Pathways (RRID:SCR_007944)

Description: The ExPASy (Expert Protein Analysis System) proteomics server of the Swiss Institute of Bioinformatics (SIB) is dedicated to the analysis of protein sequences and structures as well as 2-D PAGE. It is a curated protein sequence database which strives to provide a high level of annotation, a minimal level of redundancy and high level of integration with other databases. Recent developments of the database include format and content enhancements, cross-references to additional databases, new documentation files and improvements to TrEMBL, a computer-annotated supplement to SWISS-PROT.

Synonyms: ExPASy

Resource Type: data or information resource, database

Keywords: enzyme, classification, domain, protein sequence, structure
