Proper Citation: Gregor Mendel Institute (RRID:SCR_008534)

Description: The Gregor Mendel Institute of Molecular Plant Biology (GMI) was founded by the Austrian Academy of Sciences in 2000 in the form of a company to promote research excellence within the field of plant molecular biology. It is the only international centre for basic plant research in Austria. The GMI is located at the Vienna Biocenter Campus within the purpose-built Austrian Academy of Sciences Life Sciences Center Vienna, completed in January 2006. The Vienna Biocenter Campus, which encompasses both independent and academic research institutes as well as biotechnology companies, provides an ideal environment for the GMI. Neighbouring institutes include the Research Institute of Molecular Pathology (IMP), the Institute of Molecular Biotechnology (IMBA), as well as the Max F. Perutz Laboratories of the University of Vienna and of the Medical University of Vienna. Research at the GMI is curiosity driven and covers many aspects of molecular genetics, from basic mechanisms of epigenetics to population genetics. *Arabidopsis thaliana* is used as the primary model organism, and research groups are evaluated annually by an international external Scientific Advisory Board. The working language of the GMI is English. Research at the GMI is carried out by independent research groups, led either by senior group leaders with contracts of unlimited duration, or junior group leaders with temporary (5-3 years) appointments. GMI's research activities are supported by its administration and a platform consisting of the GMI's own services, including state-of-the-art plant growth facilities, as well as joint services with the Research Institute of Molecular Pathology and the Institute of Molecular Biotechnology. Funding: Our employees are expected to apply for grants and additional financial support from various external national and international funding bodies. The list below provides an overview of the funding opportunities that could be relevant for GMI members. The Förderassistent of the FFG (in German) or the Förderkompass of the Federal Ministry of Transport, Innovation and Technology (in German) can also be used to find appropriate funding.
