**Proper Citation:** Quovadx, Inc. (RRID:SCR\_013630)

**Description:** THIS RESOURCE IS NO LONGER IN SERVICE, documented on December 10, 2012. With Cloverleaf Integration Services from Quovadx, Inc., the FDOH now provides managers and policy makers with access to critical data residing in various counties across the state. The Cloverleaf engine is used to map legacy electronic billing formats for Medicaid to HIPAA compliant formats for three of the largest patient care systems in the state without the need to make programming changes to the existing systems that bill Medicaid. The Cloverleaf solution also guarantees the delivery of messages, enables rapid development and deployment of application interfaces between systems and provides a means of maintaining compliance with any new HIPAA format changes. While making the data available to a larger audience, the privacy and security of sensitive health data is also maintained by the solution's ability to manage security and business rules for each system.

**Abbreviations:** Quovadx

**Resource Type:** software resource
