Proper Citation: Predicting Language Outcome and Recovery After Stroke (PLORAS)
(RRID:SCR_014498)

Description: A research project investigating the difficulties of recovering language after stroke (aphasia). The overall aim of the study is to give future stroke survivors accurate predictions of their aphasia recovery by creating clinical tools and discerning why some patients recover from aphasia better than others.

Resource Type: project portal, data or information resource, portal

Keywords: stroke, aphasia, language, project portal, aphasia recovery, language outcome, recovery prediction

Related Condition: Aphasia, Stroke

Funding: Wellcome Trust ;
Stroke Association

Availability: Public

Resource Name: Predicting Language Outcome and Recovery After Stroke (PLORAS)

Resource ID: SCR_014498

Record Creation Time: 20220129T080320+0000

Record Last Update: 20260729T044353+0000

Ratings and Alerts

No rating or validation information has been found for Predicting Language Outcome and Recovery After Stroke (PLORAS).
