Proper Citation: Center for Expanded Data Annotation and Retrieval (RRID:SCR_016269)

Description: Develops information technologies that make authoring complete metadata more manageable. Its products aim to facilitate using the metadata in further research. Center to improve metadata and its use throughout biomedical sciences. Develops information technologies that make authoring complete metadata more manageable through better interfaces, terminology, metadata practices, and analytics. Optimizes metadata pathway from provider to end user. Provides way for funders to specify what metadata they want to collect as part of research life cycle.

Abbreviations: CEDAR

Resource Type: ontology, controlled vocabulary, portal, data or information resource, organization portal

Keywords: Metadata, interface, metadata practice, analytics, metadata pathway, funded research, data repository, data collection,
