Description: National and international arabidopsis germplasm resource. Stores over million genotypes in physical stocks servicing worldwide Arabidopsis community in more than 50 countries. Stocks are provided under identical cost recovery conditions to academic and commercial researchers. Non-transgenic stocks are sent gratis to K-17 institutions and in special cases. Provides seed and information resources to International Arabidopsis Genome Programme and research community. Maintains accessions of Arabidopsis thaliana (and small number of other related species), including Characterized lines, Mapping populations, and Insertion lines. You may browse or search catalog.

Abbreviations: NASC

Synonyms: European Arabidopsis Stock Centre, uNASC, Nottingham Arabidopsis Stock Centre, University of Nottingham NASC-Nottingham Arabidopsis Stock Centre, NASC code, NASC-Nottingham Arabidopsis Stock Centre
