Proper Citation: Frederick National Laboratory Protein Expression Laboratory Core Facility (RRID:SCR_021286)

Description: Comprises six service groups. Our services are available to all NIH intramural researchers, and by interagency agreements to FDA and US Army at Ft. Detrick. We are happy to consult and distribute materials to not-for-profit institutions. Clone Optimization service include DNA cloning for protein expression; Gateway-based; fluorescent, epitope, solubility, purification tags; mutagenesis; vectors for insect/ baculovirus, mammalian, E. coli, P. pastoris, K. lactis. Microbial Expression: E. coli, P. pastoris, K. lactis, 2 mL to 60 L, autoinduction and IPTG; fully instrumented fermenters. Eukaryotic Expression service include insect / baculovirus, mammalian transient and stable, monoclonal antibodies. Protein Purification service include parallel microscale for process development; affinity and native, tag and endotoxin removal; scale-up to low gram scale. Virus Technology service include custom and stock adenovirus and lentivirus production; titer determination; promoter and reporter panels in lentivirus ready to deliver. Molecular Detection: qPCR and ELISA assays developed and executed, focused on human viruses in human samples; qPCR assays for mycoplasma and human pathogenic viruses contaminating cell lines; cell line identity testing.

Abbreviations: PEL

Synonyms: FNL Protein Expression Laboratory

Resource Type: access service resource, core facility, service resource

Keywords: USEDit, ABRF

Resource Name: Frederick National Laboratory Protein Expression Laboratory Core Facility

Resource ID: SCR_021286

Alternate IDs: ABRF_341

Alternate URLs: <https://coremarketplace.org/?FacilityID=341>
