Proper Citation: University of Pennsylvania Perelman School of Medicine Microbial Culture and Metabolomics Core Facility (RRID:SCR_022417)

Description: Provides equipment for aerobic and anaerobic culture of microbial species in both batch and continuous systems, as well as targeted metabolomic services of amino, bile, and short chain fatty acids. Offers training and usage for culture equipment; consultation regarding experimental design, and; anaerobic culture services. Examples of culture studies include isolation of microbial taxa from mammalian samples; interrogation of the physiology of microbial strains under different conditions (e.g., anaerobic/microaerobic/aerobic, differing nutrient limitations) using isolated strains or strains obtained from culture collections (another service offered by the core); co-culturing of defined microbial consortia to investigate microbe-microbe interactions, and; preparation of microbial products (live bacteria, heat-killed bacteria, bacterial supernatants) from single or defined-mixed microbial cultures for use in mammalian cell culture and/or animal model systems.
