Proper Citation: Oregon Health and Science University Integrated Genomics Laboratory Core Facility (RRID:SCR_022651)

Description: Lab houses three cores providing support and services from nucleic acid isolation through data generation on multiple genomic and molecular analysis platforms. Nucleic acid extraction, qPCR, and Nanostring profiling services are available through the Gene Profiling Shared Resource for gene expression profiling, microRNA profiling, DNA genotyping and copy number analysis, and DNA methylation analyses. Currently running QuantStudio real-time PCR system. Comprehensive RNA and DNA extraction and quality assessment services available. Massively parallel sequencing (NGS) services, including library preparation, are available through Massively Parallel Sequencing Shared Resource on Illumina NovaSeq 6000 and NextSeq platforms. 10x Genomics single-cell and single-nuclei analysis services available. Cell line authentication, DNA plating, and custom oligo services are available through DNA Services Core.

Abbreviations: IGL

Synonyms: Integrated Genomics Laboratory, Oregon Health and Science University Integrated Genomics Laboratory

Resource Type: access service resource, core facility, service resource

Keywords: USEDit, ABRF, nucleic acid isolation, data generation, multiple genomic and molecular analysis platforms

Resource Name: Oregon Health and Science University Integrated Genomics Laboratory Core Facility

Resource ID: SCR_022651

Alternate IDs: ABRF_208

Alternate URLs: <https://coremarketplace.org/?FacilityID=208&citation=1>

Record Creation Time: 20220805T050153+0000

Record Last Update: 20260912T200419+0000

Ratings and Alerts

No rating or validation information has been found for Oregon Health and Science University Integrated Genomics Laboratory Core Facility.

No alerts have been found for Oregon Health and Science University Integrated Genomics Laboratory Core Facility.
