**Proper Citation:** Augusta University Transgenic and Genome Editing Core Facility (RRID:SCR\_027269)

**Description:** Core provides services in gene editing using CRISPR/Cas9 approach, services on preserving lines by cryopreservation of sperms, and resurrecting mouse lines using in vitro fertilization (IVF) or embryo transfer. Additional services include rederivation to create pathogen-free mouse lines, developing molecular reagents for genetic engineering, and providing expert advice on mouse genetics and breeding schemes.

**Resource Type:** access service resource, core facility, service resource

**Keywords:** ABRF, generating mouse models, gene editing, create pathogen-free mouse lines, developing molecular reagents for genetic engineering,

**Resource Name:** Augusta University Transgenic and Genome Editing Core Facility
