Proper Citation: Baby Open Brains (RRID:SCR_027836)

Description: Open source resource of manually curated and expert reviewed infant brain segmentations hosted on OpenNeuro.org. and OSF.io. Anatomical MRI data was segmented from 71 infant imaging visits across 51 participants, using both T1w and T2w images per visit. Images showed dramatic differences in myelination and intensities across 1–9 months, emphasizing the need for densely sampled gold-standard segmentations across early life. This dataset provides a benchmark for evaluating and improving pipelines dependent upon segmentations in the youngest populations. As such, this dataset provides a vitally needed foundation for early-life large-scale studies such as HBCD.

Synonyms: , BOBs, Baby Open Brains (BOBs) Dataset

Resource Type: data or information resource, data set

Defining Citation: [PMID:40813378](#)

Keywords: MRI, image, dataset of infant brain segmentations, infant brain, brain segmentation, manually curated infant brain segmentations,
