Proper Citation: Children's Hospital of Philadelphia CHOP Human Pluripotent Stem Cell Core Facility (RRID:SCR_028390)

Description: Core generates induced pluripotent stem cell (iPSC) lines from somatic cells including peripheral blood mononuclear cells and fibroblasts. The Core has established standard operating procedures for Pluripotent stem cell growth and maintenance, Genome editing technologies including CRISPR-CAS9 and Differentiation to germ layer and derivative tissues of interest. Provides enrichment training courses for investigators interested in learning how to work with pluripotent stem cells and/or establish the pluripotent stem cell technology in their own labs.
