Proper Citation: University of Massachusetts Amherst IALS Raman, IR, and XRF Spectroscopy Core Facility (RRID:SCR_028984)

Description: Core provides advanced spectroscopic analysis for the non-destructive characterization of organic and inorganic materials. Enables characterization of compound identity, molecular composition, chemical structure, and elemental composition. Provides chemical and elemental mapping, allowing users to determine not only what compounds or elements are present, but also where they are distributed within a sample. These capabilities support comprehensive characterization of complex and heterogeneous materials. Provides services for academic researchers and industry partners across diverse applications, including biomedical and biological samples, food and agricultural materials, environmental samples, polymers and microplastics, pharmaceuticals, advanced materials, and elemental/heavy-metal analysis.

Synonyms: IR, and XRF core facility, Raman

Resource Type: access service resource, core facility, service resource

Keywords: ABRF, spectroscopy services, spectroscopic analysis, non-destructive characterization of organic and inorganic materials,
