Proper Citation: RRID:RGD_124713548

Description: Rattus norvegicus with name W-Vdr^{em2Thka} from RGD.

Species: Rattus norvegicus

Notes: This strain was established by injecting Jcl:Wistar embryo with CRISPR/Cas9 system to disrupt the array near the arginine codon (CGC) at position 270 of the Vdr gene. This resulted in 1bp deletion and caused premature stop at p266 of the Vdr gene. They were allowed food and water ad libitum and fed a CE-2 formula diet (CLEA Japan, Inc., Tokyo, Japan) containing 1.15% calcium and 2,100 IU vitamin D3/kg diet. The Vdr knock out rats for analysis were fed an F-2 formula diet (Oriental Yeast Co., Tokyo, Japan) containing 0.74% calcium and 2000 IU vitamin D/kg diet¹² after weaning because the CE-2 diet partially reversed their rickets symptoms. Homozygotes Vdr knock out mutants were maintained by mating of heterozygotes.

Catalog Number: 124713548

Background: mutant

Database: Rat Genome Database (RGD)

Database Abbreviation: RGD

Availability: Unknown

Alternate IDs: 124713548

Organism Name: W-Vdr^{em2Thka}

Record Creation Time: 20230509T191949+0000

Record Last Update: 20260808T193746+0000

Ratings and Alerts

No rating or validation information has been found for W-Vdr^{em2Thka}.

No alerts have been found for W-Vdr^{em2Thka}.
