**Proper Citation:** (GeneTex Cat# GTX88420, RRID:AB\_10722760)

**Target Antigen:** DEPDC4 antibody

**Host Organism:** goat

**Clonality:** polyclonal

**Comments:** Discontinued; manufacturer recommendations: ELISA; ELISA. Preliminary experiments gave an approx 75kDa band in Human Brain (Amygdala) lysates and in lysates of cell lines A431 and KELLY after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 33.7kDa according to NP\_689530.1. The 75kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?
