Proper Citation: PyNiftI (RRID:SCR_000693)

Description: PyNiftI is no longer actively developed. It has been superseded by NiBabel -- a pure-Python package that provides everything that PyNiftI could do, and a lot more. The PyNiftI module is a Python interface to the NiftI I/O libraries. Using PyNiftI, one can easily read and write NiftI and ANALYZE images from within Python. The NiftImage class provides pythonic access to the full header information and for a maximum of interoperability the image data is made available via NumPy arrays.

Synonyms: PyNiftI - Pythonic access to NiftI and ANALYZE files, Pythonic access to NiftI and ANALYZE files
