Description: A complete browse and visualization tool for all types of paleoclimate and paleoecological data (Version 1.0 for Windows 3.1 and the Macintosh). Point and click to create queries, list site information, display or plot variables and data, or export the data for further processing and analysis. Note: PaleoVu is no longer maintained or supported. Data content is not being updated, and compatibility problems may exist with newer operating systems. PaleoVu is still suitable as a teaching tool, but our internet-based browsing tools are the most up to date source for paleoclimatic data.
