Proper Citation: Overleaf (RRID:SCR_003232)

Description: A collaboration tool which allows users to edit and publish scientific articles and papers. Overleaf utilizes the convenience of an easy-to-use WYSIWYG manuscript editor with real-time collaboration and structured, fully typeset output produced automatically. Authors can publish immediately and directly to their journal of choice while publishers can reduce their editorial and review turnaround times with powerful change tracking, commenting, and project lifecycle management features. It was formerly known as writeLaTex but changed its name to Overleaf in 2015.
