Description: The UAB Alzheimer's Disease Center provides comprehensive treatment for Alzheimer's patients while also promoting research for the prevention and cure of Alzheimer's disease and related disorders. The ADC is an interdisciplinary program of scientists working in areas including neurology, psychiatry, genetics, and psychology. The Center provides comprehensive treatment and promotes research for the prevention and/or cure of Alzheimer's disease and other related disorders with memory loss and impaired cognition. A major emphasis of research is the maintenance of a clinical research database comprised of neurological, medical, and neuropsychological test data from participants seen in the ADRC Clinical study since 1999, many of whom have been followed for several years in the study.
