**Description:** A neuroscience collaboratory that supports open neuroscience, which basically encompasses the unrestricted sharing of: analytic tools, computational resources, data, and knowledge. Its goal is to establish a spirit and forum for open neuroscience, and to facilitate the translation of that ethos into action by conducting successful large open interdisciplinary collaborative efforts such as releasing the preprocessed version of the ADHD-200 competition dataset. The Brain-Art Competition is likewise an effort to bring attention to the more aesthetically-oriented aspects of their field, and to publicize and encourage creative developments taking place at the nexus of art and neuroimaging.

**Resource Type:** Resource, narrative resource, blog, portal, knowledge environment, community building portal, data or information resource

**Keywords:** neuroimaging, imaging, brain, neuroscience, data sharing, community, magnetic resonance

**Related resources:** ADHD-200 Preprocessed Data, ADHD-200 Sample, Brainspell

**Availability:** Available for download

**Website Status:** Last checked up

**Abbreviations:** Neuro Bureau

**Resource Name:** Neuro Bureau
