Description: A high-throughput sequence alignment tool that aligns short DNA sequences (reads) to the whole human genome at a rate of over 1500 million 60bps reads per hour, which is one to two orders of magnitudes faster than the leading state-of-the-art techniques. Feature list for the current version (v 0.1.5) of WHAM: * Supports paired-end reads * Supports up to 5 errors * Supports alignments with gaps * Supports quality scores for filtering invalid alignments, and sorting valid alignments * finds ALL valid alignments * Supports multi-threading * Supports rich reporting modes * Supports SAM format output

Resource Type: Resource, software resource

Keywords: bio.tools

Parent Organization: University of Wisconsin-Madison; Wisconsin; USA

Funding Agency: Facebook, NSF

Availability: GNU General Public License, v3

Website Status: Last checked up

Abbreviations: WHAM

Resource Name: WHAM

Resource ID: SCR_005497
