Description: THIS RESOURCE IS NO LONGER IN SERVCE, documented September 2, 2016. CEFAM: Risk factors for atherosclerosis and cardiovascular disease, a randomized controlled study among women from the Middle East and Latin America. The study aims to analyze how two different physical activity programs in overweight and sedentary immigrant women influence changes in biomarkers related to glucose- and lipid metabolism, stress related hormone production, sub clinical inflammation, chronic cyclooxygenase mediated inflammation and oxidative stress.

Abbreviations: CEFAM
