## BrainVISA / Anatomist

**RRID:** SCR_007354  
**Type:** Tool

### Proper Citation

BrainVISA / Anatomist (RRID:SCR_007354)

### Resource Information

**URL:** [http://www.brainvisa.info/](http://www.brainvisa.info/)

**Proper Citation:** BrainVISA / Anatomist (RRID:SCR_007354)

**Description:** BrainVISA is a modular and customizable software platform built to host heterogeneous tools dedicated to neuroimaging research. Many toolboxes have already been developed for BrainVISA (T1 MRI, sulcal identification and morphometry, cortical surface analysis, diffusion imaging and tractography, fMRI, nuclear imaging, EEG and MEG, TMS, histology and autoradiography, etc.). Anatomist is a software for interactive visualization of multimodal data and for manipulation of structured 3D objects. It allows to build scenes that merge or combine images, meshes, regions of interest, fibers, textures, color palettes, referential changes, etc. A user can interact in 3D and in real time with the objects of an Anatomist scene: change point of view, select objects, add/suppress objects, change colors, draw regions of interests, do manual registration, etc. BrainVISA main features are: * Harmonization of communications between different software. For instance, BrainVISA toolboxes are using home-made software but also third-party software such as FreeSurfer, FSL, SPM, nipy, R-project, Matlab, etc. * Ontology-based data organization allowing database sharing and automation of mass of data analysis. * Fusion and interactive visualization of multimodal data (using Anatomist software). * Automatic generation of graphical user interfaces. * Workflow monitoring and data quality checking. * Full customization possible. * Runs on Linux, Mac and Windows. * Programming Language: C++, Python * Supported Data Format: ANALYZE, DICOM, GifTI, MINC, NIfTI-1, Other Format

**Synonyms:** BrainVISA/Anatomist, BrainVISA

**Resource Type:** software development environment, image analysis software, software application, software development tool, image processing software, data processing software, software resource
Keywords: neuroimaging, database, tensor metric, morphology, quantitative shape analysis, segmentation, spatial transformation, surface analysis, diffusion mr fiber tracking, visualization, platform environment, development environment, FASEB list

Funding Agency: French Ministry of Higher Education and Research, ACI telemedecine

Availability: CeCILL license v2

Resource Name: BrainVISA / Anatomist

Resource ID: SCR_007354

Alternate IDs: nif-0000-00264

Ratings and Alerts

- 3 / 5 (1 votes) Rated at NITRC http://www.nitrc.org/projects/brainvisa

No alerts have been found for BrainVISA / Anatomist.

Data and Source Information
