Proper Citation: Biological Concept Diagram Editor (RRID:SCR_008654)

Description: Biological Concept Diagram Editor (BCDE) is a conceptual relationship diagramming tool specifically designed for biomedical researchers. It allows for efficient knowledge and data capture, fast diagram creation, easy data retrieval, and flexible exporting. The BCDE application is the main diagramming tool in the system. Through it, users can create, modify, load, and save BCDE diagrams. The diagrams created with BCDE application are network oriented. Each BCDE figure can be annotated using fields from the BioPAX level II format. In addition, a user can add URL links and attachments to a BCDE figure. Diagrams generated in BCDE are stored in the BCDE XML format for better database integration and better data extraction.

Abbreviations: BCDE

Resource Type: software resource, software application, data visualization software, data processing software

Keywords: biological, biomedical, concept, data visualization, diagram, drawing, research, software, tool

Funding:

Resource Name: Biological Concept Diagram Editor

Resource ID: SCR_008654

Alternate IDs: nif-0000-33033

License URLs: <http://portal.ncibi.org/gateway/bcde-support.html>

Record Creation Time: 20220129T080248+0000

Record Last Update: 20250517T055905+0000

Ratings and Alerts

No rating or validation information has been found for Biological Concept Diagram Editor.

No alerts have been found for Biological Concept Diagram Editor.
