### Resource Information

**URL:** <http://scholar.google.com/>

**Proper Citation:** Google Scholar (RRID:SCR\_008878)

**Description:** Google Scholar provides a simple way to broadly search for scholarly literature. From one place, you can search across many disciplines and sources: articles, theses, books, abstracts and court opinions, from academic publishers, professional societies, online repositories, universities and other web sites. Google Scholar helps you find relevant work across the world of scholarly research. Features of Google Scholar \* Search diverse sources from one convenient place \* Find articles, theses, books, abstracts or court opinions \* Locate the complete document through your library or on the web \* Learn about key scholarly literature in any area of research How are documents ranked? Google Scholar aims to rank documents the way researchers do, weighing the full text of each document, where it was published, who it was written by, as well as how often and how recently it has been cited in other scholarly literature. \* Publishers - Include your publications in Google Scholar \* Librarians - Help patrons discover your library's resources

**Abbreviations:** Google Scholar

**Resource Type:** database, data or information resource

**Keywords:** literature

**Funding:**

**Resource Name:** Google Scholar

**Resource ID:** SCR\_008878

**Alternate IDs:** nlx\_151304

**Record Creation Time:** 20220129T080249+0000

**Record Last Update:** 20250412T055324+0000
