Resource Information

URL: http://genome.sph.umich.edu/wiki/Minimac

Description: Software application that is a low memory, computationally efficient implementation of the MaCH algorithm for genotype imputation. It is designed to work on phased genotypes and can handle very large reference panels with hundreds or thousands of haplotypes. The name has two parts. The first, mini, refers to the modest amount of computational resources it requires. The second, mac, is short hand for MaCH, our widely used algorithm for genotype imputation. (entry from Genetic Analysis Software)

Resource Name: MINIMAC
Proper Citation: MINIMAC (RRID:SCR_009292)
Resource Type: Resource, software resource, software application
Keywords: gene, genetic, genomic
Resource ID: SCR_009292
Website Status: Last checked up
Alternate IDs: nlx_154483
Abbreviations: MINIMAC
Mentions Count: 85

Ratings and Alerts
No rating or validation information has been found for MINIMAC.

No alerts have been found for MINIMAC.
