Proper Citation: UCLA Clinical and Translational Research Laboratory (RRID:SCR_012202)

Description: The Clinical & Translational Research Laboratory (CTRL) offers a full range of cost-effective laboratory testing to support your research efforts. The laboratory performs routine chemistry tests (basic metabolic panel, comprehensive metabolic group, electrolyte panel, hepatic panel, lipid panel and individual tests), thyroid function tests, fertility tests, tumor marker tests, basic coagulation testing and routine urinalysis testing. These tests are performed in the CTRL lab; however, referral tests can be sent to the UCLA Clinical Laboratory or outside reference laboratories. New assays not on the test menu can be validated and performed to meet the needs of individual research investigators. The laboratory is California-licensed, CLIA-certified, and CAP-accredited. A copy of each certificate can be issued upon request. The lab is staffed by ten research scientists, two hospital laboratory technicians, and two clinical laboratory scientists. It occupies approximately 5,000 square feet of space located on the A-level of the Center for Health Sciences (CHS) building. The facility works with investigators both inside and outside the UCLA enterprise on a collaborative and fee-for-service basis.

Abbreviations: UCLA CTRL
