Proper Citation: Purdue University Proteomics Core Facility (RRID:SCR_012351)

Description: Provides LCMS/MS analysis of proteins in clinical, environmental and other biological samples. As a shared facility of the Bindley Bioscience Center (BBC) in Discovery Park of Purdue University, the facility enables both targeted and global analysis of proteins, their post-translational modifications and analysis of protein complexes and protein-protein interactions. Coupled with different chromatographic separation techniques, modern mass spectrometric instrumentation, and advanced scientific and bioinformatics expertise, the facility provides unique opportunities for researchers at Purdue and beyond to perform quantitative analysis of proteins in complex biological samples using both global, as well as, targeted proteomic approaches.

Abbreviations: PPF

Synonyms: Purdue Proteomics Facility

Resource Type: service resource, access service resource, core facility

Keywords: amino acid analysis, high-performance liquid chromatography, ltq linear ion trap mass spectrometry, matrix-assisted laser desorption ionization time-of-flight tandem mass spectrometry, nano liquid chromatography ion trap mass spectrometry, nano liquid chromatography triple quadrupole mass spectrometry, mass spectrometry

Resource Name: Purdue University Proteomics Core Facility

Resource ID: SCR_012351
