Description: A collaborative institute of the bioinformatics groups in the Netherlands that perform cutting-edge research, develop novel tools and support platforms, create an e-science infrastructure and educate the next generations of bioinformaticians. They aim to build and maintain a strong bioinformatics and e-bioscience community that meets the (growing) demand for bioinformatics expertise, infrastructure and personnel in the Dutch life sciences field and provides a stimulating force for advanced research in biology. The NBIC grants aim to support the NBIC projects and (the visibility of) the NBIC community. Therefore, only people working in NBIC partner organizations can apply for sponsoring by NBIC. Positions for postdocs and others are available and there is a yearly conference.
