Type: Tool

Proper Citation

GNU Octave (RRID:SCR_014398)

Resource Information

URL: https://www.gnu.org/software/octave/

Description: A high-level language, primarily intended for numerical computations. It provides a convenient command line interface for solving linear and nonlinear problems numerically, and for performing other numerical experiments. It may also be used as a batch-oriented language. Octave has extensive tools for solving common numerical linear algebra problems, finding the roots of nonlinear equations, functions written in the Octave language, or by using dynamically loaded modules written in C, C++, Fortran, or other languages.

Resource Name: GNU Octave

Proper Citation: GNU Octave (RRID:SCR_014398)

Resource Type: Resource, software resource, programming language

Keywords: command-line, free software, array programming, programming language, mathematics, reproducible research,

Resource ID: SCR_014398

Related resources: Mastrave modelling library
