Description: Modular program for SPM (scanning probe microscopy) data visualization and analysis. Primarily it is intended for the analysis of height fields obtained by scanning probe microscopy techniques (AFM, MFM, STM, SNOM/NSOM) and it supports a lot of SPM data formats. However, it can be used for general height field and (greyscale) image processing, for instance for the analysis of profilometry data or thickness maps from imaging spectrophotometry.

Resource Type: Resource, software resource, software application, data analysis software, data processing software

Keywords: spm data analysis, spm data visualization, height field analysis

Funding Agency: Czech Metrology Institute Department of Nanometrology

Availability: Open source

Website Status: Last checked up

Resource Name: Gwyddion

Resource ID: SCR_015583
